Fund highlights

The JPMF Indonesia Fund aims for long-term capital growth by investing in the prospects of Indonesian small cap companies with strong business models and attractive valuations.

The fund uses a bottom-up investment process for stock selection, with on-the-ground research through frequent company visits forming the cornerstone of the process. The fund aims to hold a concentrated portfolio of high conviction stocks.

The fund is managed by an experienced team dedicated to managing assets in south east Asia.

Investor suitability

Investor profile

This is an equity Sub-Fund designed for investors looking for exposure to the Indonesian stock market. Therefore, the Sub-Fund may be suitable for investors who are looking to add Indonesian stock market exposure to an existing diversified portfolio, or for investors looking for an Indonesian equity investment aimed at producing long-term capital growth.

Key risks

The value of equity securities may go down as well as up in response to the performance of individual companies and general market conditions.

The single market in which the Sub-Fund invests may be subject to particular political and economic risks, and as a result, the Sub-Fund may be more volatile than more broadly diversified funds.

Emerging markets may be subject to increased risks, including less developed custody and settlement practices, higher volatility and lower liquidity than non emerging market securities.

The Sub-Fund may be concentrated in a limited number of securities and industry sectors and as a result, may be more volatile than more broadly diversified funds.

The Sub-Fund may invest in securities of smaller companies which may be less liquid, more volatile and tend to carry greater financial risk than securities of larger companies.

Movements in currency exchange rates can adversely affect the return of your investment.

Explanatory Notes, Risks and Important Information

Notes

^AThe Morningstar Style Box [™] indicates the fund's investment strategy. For equity funds the vertical axis shows the capitalization of the shares held by the fund, and the horizontal axis shows investment style (value, mixed, or growth). In bond funds, the vertical axis shows the average risk quality of the bonds the fund owns, and the horizontal axis indicates sensitivity to interest rates, as measured by the duration of the bond (short, medium, or long).

^BFor reactivated share classes the performance is shown from the date of reactivation and not the share class launch date.
