### PERFORMANCE DISCLOSURES

*Past performance is not a guide to current and future performance. The value of your investments and any income from them may fall as well as rise and you may not get back the full amount you invested.*

Source: J.P.Morgan Asset Management. Share class performance shown is based on the quoted price of the share class, assumes any net income was reinvested, and includes ongoing charges but not any entry or exit fees. Indices do not include fees or operating expenses and you cannot invest in them.

The Yield reflects net distributions declared over the past 12 months as a percentage of the quoted price at the date shown. It does not include the Entry charge and investors may be subject to tax on their distributions. Where a portion of the fund's expenses are charged to capital this has the effect of increasing the distribution for the year and constraining the fund's capital performance to an equivalent extent.

See the material risks, general disclosures and definitions on page 2.

## Holdings

Steel	0.0	-0.9
Cash	2.5	+2.5

## Key risks

The value of equity and equity-linked securities may fluctuate in response to the performance of individual companies and general market conditions.

Emerging markets may be subject to increased political, regulatory and economic instability, less developed custody and settlement practices, poor transparency and greater financial risks. Emerging market currencies may be subject to volatile price

movements. Emerging market securities may also be subject to higher volatility and be more difficult to sell than non-emerging market securities.

The Fund invests in securities of smaller companies which may be more difficult to sell, more volatile and tend to carry greater financial risk than securities of larger companies.

The Fund will be concentrated in natural resources companies and may be concentrated in one or more countries. As a result, the Fund may be more volatile than more broadly diversified funds.

The value of companies in which the Fund invests may be influenced by movements in commodity prices which can be very volatile.

This Fund is aggressively managed, which may result in higher volatility of the Fund's performance and bigger differences between the performance of the Fund and its benchmark. Movements in currency exchange rates can adversely affect the return of your investment.

## GENERAL DISCLOSURES

Before investing, obtain and review the current Prospectus, Key Investor Information Document (KIID) and the Key Features Document/Terms & Conditions for this fund which are available from JPMorgan Asset Management Marketing Limited.

This material should not be considered as advice or an investment recommendation. Fund holdings and performance are likely to have changed since the report date. No provider of information presented here, including index and ratings information, is liable for damages or losses of any type arising from use of their information. Information from communications with you will be recorded, monitored, collected, stored and processed consistent with our EMEA Privacy Policy (available at [jpmorgan.com/pages/privacy](http://jpmorgan.com/pages/privacy)).

On 01/03/07 a customised index was introduced in order to facilitate a comparison between the Fund's performance and that of the broader Natural Resources sector. Please note that the Fund should not be expected to look or perform similar to the index. Prior to 04/01/16 the benchmark was Euromoney Global Gold, Mining & Energy Index (Total Return Net).

## ISSUER

JPMorgan Asset Management Marketing Limited  
Registered address: 25 Bank Street, Canary Wharf London E14 5JP, United Kingdom. Authorised and regulated by the Financial Conduct Authority. Registered in England No. 288553.

## DEFINITIONS

**NAV** Net Asset Value of a fund's assets less its liabilities per Share.

**Quoted Price** The single price at which all client orders are executed.

**Morningstar Analyst Rating™** Morningstar's forward looking fund rating.

**Rayner Spencer Mills rated fund** rating as at 30 September 2017.

Uses both a qualitative and quantitative assessment of the funds. The fund is simply rated or not.

**Correlation** measures the relationship between the movement of the fund and its benchmark. A

correlation of 1.00 indicates that the fund perfectly matched its benchmark.

**Alpha (%)** a measure of excess return generated by a manager compared to the benchmark. An alpha of 1.00 indicates that a fund has outperformed its benchmark by 1%.

**Beta** a measure of a fund's sensitivity to market movements (as represented by the fund's benchmark). A beta of 1.10 suggests the fund could perform 10% better than the benchmark in up markets and 10% worse in down markets, assuming all other factors remain constant.

**Annualised volatility (%)** an absolute measure of volatility and measures the extent to which returns vary up and down over a given period. High volatility means that the returns have been more variable over time. The measure is expressed as an annualised value.

**Sharpe ratio** measures the performance of an investment adjusting for the amount of risk taken (compared a risk-free investment). The higher the Sharpe ratio the better the returns compared to the risk taken.

**Tracking error (%)** measures how much a fund's returns deviate from those of the benchmark. The lower the number the closer the fund's historic performance has followed its benchmark.

**Information ratio (IR)** measures if a manager is outperforming or underperforming the benchmark and accounts for the risk taken to achieve the returns. A manager who outperforms a benchmark by 2% p.a. will have a higher IR than a manager with the same outperformance but who takes more risk.
