Fund overview

ISIN LU0456854461 Bloomberg JPMGASD LX Reuters LU0456854461.LUF

Investment objective: To provide long-term capital growth by investing primarily in natural resources companies, many of which are in the early stages of exploration.

Investor profile: This is a specialist sector equity Sub-Fund investing in natural resources companies, globally, many of which are in the early stages of exploration. Although this focused approach can result in high relative returns when the commodities sector is in favour with the market, investors can suffer long periods of underperformance when the sector falls out of favour. However, natural resources stocks have in the past demonstrated a low correlation with the stock market, which means that investing in the Sub-Fund may add diversification benefits to existing equity portfolios. The Sub-Fund may, therefore, be suitable for investors looking for a higher risk equity strategy to complement an existing core portfolio, or for experienced, diversified investors looking for exclusive exposure to a single stock market sector.

Fund manager(s) Neil Gregson Christopher Korpan	Fund assets EUR 738.3m	Domicile Luxembourg
Client portfolio manager(s) James Sutton	NAV SGD 11.95	Entry/exit charges Entry charge (max) 5.00% Exit charge (max) 0.50%

PERFORMANCE DISCLOSURES

Past performance is not a guide to current and future performance. The value of your investments and any income from them may fall as well as rise and you may not get back the full amount you invested.

Source: J.P. Morgan Asset Management. Share class performance is shown based on the NAV (net asset value) of the share class with income (gross) reinvested including actual ongoing charges excluding any entry and exit fees. Indices do not include fees or operating expenses and you cannot invest in them.

The benchmark is for comparative purposes only unless specifically referenced in the Sub-Fund's Investment Objective and Policy.

See the material risks, general disclosures and definitions on page 2.

Key risks

Because the Sub-Fund is aggressively managed, volatility may be high as the Sub-Fund may take larger position sizes, may have high turnover of holdings and at times may have a significant exposure to certain areas of the market. The value of equity securities may go down as well as up in response to the performance of individual

companies and general market conditions. Emerging markets may be subject to increased risks, including less developed custody and settlement practices, higher volatility and lower liquidity than non emerging market securities. The Sub-Fund will be concentrated in natural resources companies and as a result, may be more volatile than more broadly diversified funds. The Sub-Fund may invest in securities of smaller companies which may be less liquid, more volatile

and tend to carry greater financial risk than securities of larger companies. The value of companies in which the Sub-Fund invests may be influenced by movements in commodity prices which can be very volatile. Movements in currency exchange rates can adversely affect the return of your investment. The currency hedging that may be used to minimise the effect of currency fluctuations may not always be successful.

GENERAL DISCLOSURES

Before investing, obtain and review the current prospectus, Key Investor Information Document (KIID) and any applicable local offering document. These documents, as well as the annual and semi-annual reports and the articles of incorporation, are available free from your financial adviser, your J.P. Morgan Asset Management regional contact, the fund's issuer (see below) or at www.jpmmam.lu. This material should not be considered as advice or an investment recommendation. Fund holdings and performance are likely to have changed since the report date. No provider of information presented here, including index and ratings information, is liable for damages or losses of any type arising from use of their information. No warranty of accuracy is given and no liability in respect of any error or omission is accepted. To the extent permitted by applicable law, we may record telephone calls and monitor electronic communications to comply with our legal and regulatory obligations and internal policies. Personal data will be collected, stored and processed by J.P. Morgan Asset Management in accordance with our EMEA Privacy Policy www.jpmmam.com/jpmpdf/1320694304816.pdf. For additional information on the sub-fund's target market please refer to the Prospectus.

On 01/03/07 a customised index was introduced in order to facilitate a comparison between the Fund's performance and that of the broader Natural Resources sector. Please note that the Fund should

not be expected to look or perform similar to the index. Prior to 04.01.16 the benchmark was Euromoney Global Gold, Mining & Energy Index (Total Return Net).

DEFINITIONS

Correlation measures the relationship between the movement of the fund and its benchmark. A

correlation of 1.00 indicates that the fund perfectly matched its benchmark.

Alpha (%) a measure of excess return generated by a manager compared to the benchmark. An alpha of 1.00 indicates that a fund has outperformed its benchmark by 1%.

Beta a measure of a fund's sensitivity to market movements (as represented by the fund's benchmark). A beta of 1.10 suggests the fund could perform 10% better than the benchmark in up markets and 10% worse in down markets, assuming all other factors remain constant.

Annualised volatility (%) an absolute measure of volatility and measures the extent to which returns vary up and down over a given period. High volatility means that the returns have been more variable over time. The measure is expressed as an annualised value.

Sharpe ratio measures the performance of an investment adjusting for the amount of risk taken (compared a risk-free investment). The higher the Sharpe ratio the better the returns compared to the risk taken.

Tracking error (%) measures how much a fund's returns deviate from those of the benchmark. The lower the number the closer the fund's historic performance has followed its benchmark.

Information ratio (IR) measures if a manager is outperforming or underperforming the benchmark and accounts for the risk taken to achieve the returns. A manager who outperforms a benchmark by 2% p.a. will have a higher IR than a manager with the same outperformance but who takes more risk.
