

JPMorgan Global Convertibles Income Fund Limited

Monthly Update as at 31 October 2017

Overall Morningstar Rating™ (as at 31/10/17) ^A ★ ★ ★
Morningstar Category™ Convertible Bond - Global, GBP Hedged

Management Commentary

The trust delivered a positive share price and net asset return. Performance was largely driven by rising equity markets, which were supported by economic data releases and corporate earnings results that continue to point to a healthy global economy. Our holdings in consumer cyclicals and energy were the top performers. Energy names rebounded in September in response to a stabilisation in the oil price following a weak August. On a regional basis, the US and Europe remain our top positions in the portfolio and we saw strong performance out of both of these regions. We continue to see evidence for the synchronised global recovery in earnings after several years of stagnation as economic growth improves, supporting equity and convertible markets globally.

JPMorgan Global Convertibles Income Fund Limited

SECTOR BREAKDOWN AS AT 31 OCTOBER 2017 ¹

The Trust is an actively managed portfolio, holdings, sector weights, allocations and leverage, as applicable are subject to change at the discretion of the Investment Manager without notice.

RISK INFORMATION

- Exchange rate changes may cause the value of underlying overseas investments to go down as well as up.
- This trust may invest in non investment grade bonds which increases the capital risk and have an adverse effect on the performance of funds which invest in them.
- For income funds/shares - Dividend income is not guaranteed and will fluctuate.
- Investing in high yielding stocks may involve higher degree of risk as high yields are not guaranteed and will fluctuate.
- This fund may use derivatives for investment purposes or for efficient portfolio management.
- Convertible bonds are subject to the risks associated with both debt and equity securities, and to risks specific to convertible securities. Investors should be prepared for greater volatility than straight bond investments, with an increased risk of capital loss, but with the potential of higher returns. Their value may change significantly depending on economic and interest rate conditions, the creditworthiness of the issuer, the performance of the underlying equity and general financial market conditions. In addition, issuers of convertible bonds may fail to meet payment obligations and their credit ratings may be downgraded. This is generally known as credit risk. Convertible bonds may also be subject to lower liquidity than the underlying equity securities.
- External factors may cause an entire asset class to decline in value. Prices and values of all shares or all bonds could decline at the same time, or fluctuate in response to the performance of individual companies and general market conditions.
- This trust may utilise gearing (borrowing) which will exaggerate market movements both up and down.
- This trust may also invest in smaller companies which may increase its risk profile.
- The share price may trade at a discount to the Net Asset Value of the company.

EXPLANATORY NOTES

^A © 2017 Morningstar. All Rights Reserved. The information contained herein: (1) is proprietary to Morningstar; (2) may not be copied or distributed; and (3) is not warranted to be accurate, complete or timely. Neither Morningstar nor its content providers are responsible for any damages or losses arising from any use of this information. Past performance is no guarantee of future results.

^B Total return - using capital only NAVs with net dividend (if any) reinvested, in sterling, unless otherwise stated. Source: J.P. Morgan/Morningstar (www.morningstar.co.uk)

^C Due to the currently low net asset value and high gearing of the share class, the NAV performance numbers are extremely volatile and therefore none are disclosed.

^D Cum income NAV with debt at fair value, diluted for treasury and/or subscription shares if applicable, with any income reinvested.

^E On 01/07/16 the benchmark changed from the MSCI World Index (Total Return Net) to the Bloomberg Barclays Credit Sensitive Convertibles Index (hedged into Sterling). To improve the comparison of the Company's performance against its new benchmark over the long term, the benchmark data shown tracks the Bloomberg Barclays Credit Sensitive Convertibles Index (hedged into Sterling) as if it applied since the fund's inception.

^F Source: Morningstar. Prospective dividend yield is indicative and based on mid market prices, and include the declared and net prospective dividends for the current financial year.

^G Gearing represents the excess amount above shareholders' funds of total investments (excluding liquidity fund holdings) expressed as a percentage of the shareholders' funds. If the amount calculated is negative, this is known as a "net cash" position.

^H Ongoing charges are the management fee and all other operating expenses, excluding interest charges on any borrowing and any performance fee payable expressed as a percentage of the average daily net assets during the year. All figures are for the previous financial year.

^I Non-Benchmark holdings (where held) are classified in the appropriate sector/region. Cash is net current assets and holdings used as cash substitutes if applicable.

IMPORTANT INFORMATION

This factsheet is to provide you summary information about the Company and should not be taken as an advice or recommendation to buy or sell its shares. GLOSSARY OF TERMS

BENCHMARK COMPARISON - Comparison of the Company's performance is made with the benchmark. The benchmark is a recognised index of stocks which should not be taken as wholly representative of the Company's investment universe. The Company's investment strategy does not follow or track this index and therefore there may be a degree of divergence between its performance and that of the Company.

CASH - Net current assets including investment in liquidity funds & treasury stocks (if held) and drawn revolving credit facilities (if any) with an original maturity of less than 1 year.

DISCOUNT / PREMIUM - If the share price of an investment company is lower than the net asset value (NAV) per share, the company is said to be trading at a discount. If the share price of an investment company is higher than the net asset value (NAV) per share, the company is said to be trading at a premium. The discount/premium is shown as a percentage of the NAV.

GEARING - Gearing represents the excess amount above shareholders' funds of total assets expressed as a percentage of the shareholders' funds. Total assets include total investments and net current assets/liabilities less cash/cash equivalents and excluding bank loans of less than one year. If the amount calculated is negative this is known as a 'net cash' position.

SECTOR / GEOGRAPHICAL BREAKDOWNS - These are expressed as a percentage of total portfolio and cash. Investments in liquidity funds will be shown as cash.

TOP 10 HOLDINGS - These are expressed as a percentage of total portfolio and cash. Investments in liquidity funds / treasury stocks will not be shown in the top 10 holdings.
