

JPMorgan ETFs (Ireland) ICAV -

Carbon Transition Global Equity (CTB) UCITS ETF

Class: JPM Carbon Transition Global Equity (CTB) UCITS ETF - USD (acc)

Fund overview

ISIN IE00BMDWYZ92		
Investment objective: The Sub-Fund seeks to provide returns that correspond to those of its Index.		
Investment policy: The Sub-Fund pursues a passively managed (index-tracking) strategy.		
Investment approach		
<ul style="list-style-type: none"> Seeks to replicate the Index by holding all of the Index Securities in a similar proportion to their weighting in the Index. The Index is designed to capture the performance of companies which have been identified through its rules-based process as best positioned to benefit from a transition to a low carbon economy by effectively managing their emissions, resources and climate-related risks. 		
Investor profile: Typical investors in the Sub-Fund are expected to be those who seek exposure to the markets covered by the Index and seek to invest in companies best positioned to benefit from a transition to a low carbon economy

Performance Disclosures

Past performance is not a guide to current and future performance. The value of your investments and any income from them may fall as well as rise and you may not get back the full amount you invested.

Key risks

The value of your investment may fall as well as rise and you may get back less than you originally invested.

The value of equities may go down as well as up in response to the performance of individual companies and general market conditions, sometimes rapidly or unpredictably. If a company goes through bankruptcy or a similar financial restructuring, its shares in issue typically lose most or all of their value.

Since the instruments held by the Sub-Fund may be denominated in currencies other than the Base Currency, the Sub-Fund may be affected unfavourably by exchange control regulations or fluctuations in currency rates. For this reason, changes in currency exchange rates can affect the value of the Sub-Fund's portfolio and may impact the value of the Shares.

The exclusion of companies that do not meet certain ESG criteria from the Sub-Fund's Investable Universe, through the screening performed as part of the index methodology described above, may cause the Sub-Fund to perform differently compared to similar funds that do not have such a policy.

To the extent that the Sub-Fund uses financial derivative instruments, the risk profile and the volatility of the Sub-Fund may increase. That notwithstanding, the risk profile of the Sub-Fund is not expected to significantly deviate from that of the Index as a result of its use of financial derivative instruments.

The Sub-Fund is not expected to track the performance of the Index at all times with perfect accuracy. The Sub-Fund is, however, expected to provide investment results that, before expenses, generally correspond to the price and yield performance of the Index

based on the actual costs incurred over the past year.

Performance information

Source: J.P. Morgan Asset Management. Share class performance is shown based on the NAV (net asset value) of the share class with income (gross) reinvested including actual ongoing charges excluding any entry and exit fees. Performance is shown based on the NAV which may not be the same as the market price of the ETF. Individual shareholders may realise returns that are different to the NAV based returns.

The return of your investment may change as a result of currency fluctuations if your investment is made in a currency other than that used in the past performance calculation.

Indices do not include fees or operating expenses and you cannot invest in them.

The benchmark is for comparative purposes only unless specifically referenced in the Sub-Funds' Investment Objective and Policy.

Regional Contact

JPMorgan Asset Management (UK) Limited Registered address: 25 Bank Street, Canary Wharf, London E14 5JP, United Kingdom. Authorised and regulated by the Financial Conduct Authority. Registered in England No. 01161446.

Issuer

JPMorgan Asset Management (Europe) S.à r.l., 6, route de Trèves, L-2633 Senningerberg, Luxembourg. B27900, corporate capital EUR 10,000,000. The Sub-Fund is authorised in Ireland and regulated by the Central Bank of Ireland.

Definitions

NAV Net Asset Value of a fund's assets less its liabilities per Share.

Correlation measures the strength and direction of the relationship between movements in fund and benchmark returns. A correlation of 1.00 indicates that fund and benchmark returns move in lockstep in the same direction.

Alpha (%) a measure of excess return generated by a manager compared to the benchmark. An alpha of 1.00 indicates that a fund has outperformed its benchmark by 1%.

Beta measures a fund's sensitivity to market movements (as represented by the fund's benchmark). A beta of 1.10 suggests the fund could perform 10% better than the benchmark in up markets and 10% worse in down markets, assuming all other factors remain constant. Usually the higher betas represent riskier investments.

General Disclosures

Before investing, obtain and review the current prospectus, Key Investor Information Document (KIID), and any applicable local offering document. These documents, as well as the annual and semi-annual reports and the articles of incorporation, are available in English from your financial adviser, your J.P. Morgan Asset Management regional contact, the fund's issuer (see below) or at <https://am.jpmorgan.com/gb/en/asset-management/per/>. A summary of investor rights is available in English at <https://am.jpmorgan.com/lu/investor-rights>. J.P. Morgan Asset Management may decide to terminate the arrangements made for the marketing of its collective investment undertakings.

This material should not be considered as advice or an investment recommendation. Fund holdings and performance are likely to have changed since the report date. No provider of information presented here, including index and ratings information, is liable for damages or losses of any type arising from use of their information. No warranty of accuracy is given and no liability in respect of any error or omission is accepted.

To the extent permitted by applicable law, we may record telephone calls and monitor electronic communications to comply with our legal and regulatory obligations and internal policies. Personal data will be collected, stored and processed by J.P. Morgan Asset Management in accordance with our EMEA Privacy Policy www.jpmorgan.com/emea-privacy-policy.

The Fund does not rely on external support for guaranteeing the liquidity of the Fund or stabilising the NAV per share. The Sub-Fund is rated by an external credit rating agency. Such rating is financed by the Sub-Fund.

The Sub-Fund has received approval of a derogation from the CSSF (Commission de Surveillance du Secteur Financier) to invest up to 100% of its assets in different money market instruments issued or guaranteed separately by certain organisations. The Sub-Fund intends to invest more than 5% of its assets in the organisations listed in the Prospectus.

For additional information on the sub-fund's target market please refer to the Prospectus.

The risk indicator is based on the historic volatility of the Net Asset Value of the Share Class over the last five years and may not be a reliable indication of the future risk profile of the Share Class. The risk and reward category shown above is not guaranteed to remain unchanged and may change over time. A Share Class with the lowest risk rating does not mean a risk-free investment. See the Key Investor Information Document (KIID) for details.

The possible difference between the current ongoing charge as stated in this document and those mentioned in the KIID, is caused by the fact that the costs mentioned in the KIID are an estimate

Annualised volatility (%) measures the extent to which returns vary up and down over a given period.

Sharpe ratio performance of an investment adjusting for the amount of risk taken (compared a risk-free investment). The higher the Sharpe ratio the better the returns compared to the risk taken.

Tracking error (%) measures how much a fund's returns deviate from those of the benchmark. The lower the number the closer the

fund's historic performance has followed its benchmark.

Information ratio measures if a manager is outperforming or underperforming the benchmark and accounts for the risk taken to achieve the returns. A manager who outperforms a benchmark by 2% p.a. will have a higher IR than a manager with the same outperformance but who takes more risk.
