

JPMorgan American Investment Trust plc

Monthly Update as at 31 July 2017

Overall Morningstar Rating™ (as at 31/07/17) ^A ★★★★★
Morningstar Category™ US Large-Cap Blend Equity

Management Commentary

The Company's share price and net asset value outperformed the benchmark in June. Our stock selection in the healthcare and consumer discretionary sectors contributed positively to relative returns. In healthcare, our overweight position in Amgen was the top contributor. At the security level, our overweight in financials name Citigroup also added value as investors cheered the prospects of a stronger capital return plan and interpreted the Treasury Department's recent white paper to indicate a greater likelihood of a more favourable regulatory landscape for financials. On the other hand, our stock selection in the financials space and our sector allocation in the information technology sector weighed on returns. In financials, our overweight position in AIG was among the largest detractors. Among individual names, our overweight in information technology name Apple also detracted from relative performance.

CUMULATIVE PERFORMANCE ENDING JULY 2017 ^B

% based to 100

QUARTERLY ROLLING 12M ENDING JUNE 2017 ^B

Wal-Mart	Consumer Staples	2.2%
AIG	Financials	2.1%

INVESTMENT OBJECTIVE AND POLICY

Aims to achieve capital growth from North American investments by outperformance of the S&P 500 index. The company will predominantly invest in quoted companies including, when appropriate, exposure to smaller capitalisation companies, and emphasise capital growth rather than income. The company has the ability to use borrowing to gear the portfolio within the range of 5% net cash to 20% geared in normal market conditions.

JPMorgan American Investment Trust plc

SECTOR BREAKDOWN AS AT 31 JULY 2017 ¹

The Trust is an actively managed portfolio, holdings, sector weights, allocations and leverage, as applicable are subject to change at the discretion of the Investment Manager without notice.

RISK INFORMATION

- Exchange rate changes may cause the value of underlying overseas investments to go down as well as up.
- External factors may cause an entire asset class to decline in value. Prices and values of all shares or all bonds could decline at the same time, or fluctuate in response to the performance of individual companies and general market conditions.
- This trust may utilise gearing (borrowing) which will exaggerate market movements both up and down.
- This trust may also invest in smaller companies which may increase its risk profile.
- The share price may trade at a discount to the Net Asset Value of the company.
- The single market in which the trust primarily invests, in this case the US, may be subject to particular political and economic risks and, as a result, the trust may be more volatile than more broadly diversified trusts.

EXPLANATORY NOTES

^A © 2017 Morningstar. All Rights Reserved. The information contained herein: (1) is proprietary to Morningstar; (2) may not be copied or distributed; and (3) is not warranted to be accurate, complete or timely. Neither Morningstar nor its content providers are responsible for any damages or losses arising from any use of this information. Past performance is no guarantee of future results.

^B Total return - using capital only NAVs with net dividend (if any) reinvested, in sterling, unless otherwise stated. Source: J.P. Morgan/Morningstar (www.morningstar.co.uk)

^C Due to the currently low net asset value and high gearing of the share class, the NAV performance numbers are extremely volatile and therefore none are disclosed.

^D Cum income NAV with debt at fair value, diluted for treasury and/or subscription shares if applicable, with any income reinvested.

^E Source: Morningstar. Prospective dividend yield is indicative and based on mid market prices, and include the declared and net prospective dividends for the current financial year.

^F Gearing represents the excess amount above shareholders' funds of total investments (excluding liquidity fund holdings) expressed as a percentage of the shareholders' funds. If the amount calculated is negative, this is known as a "net cash" position.

^G Ongoing charges are the management fee and all other operating expenses, excluding interest charges on any borrowing and any performance fee payable expressed as a percentage of the average daily net assets during the year. All figures are for the previous financial year.

^H A fee, potentially payable to the investment manager in addition to annual management charges, should the trust meet certain performance criteria. The performance fee is calculated at the rate of 10% of the difference between the net asset value capital return and the capital return of the S&P 500 Index in sterling terms. The maximum performance fee payable in any one year is capped at 0.25% of the net asset value at the previous year end. Please refer to the annual report for further information on how the performance fee is calculated.

^I Non-Benchmark holdings (where held) are classified in the appropriate sector/region. Cash is net current assets and holdings used as cash substitutes if applicable.

IMPORTANT INFORMATION

This factsheet is to provide you summary information about the Company and should not be taken as an advice or recommendation to buy or sell its shares. If you are not sure of suitability of our products for your investment needs, please contact a financial adviser. Please ensure reading important product documentation including Key Features and Terms and Conditions, Investor Disclosure Document and Annual Reports and Accounts.

GLOSSARY OF TERMS

BENCHMARK COMPARISON - Comparison of the Company's performance is made with the benchmark. The benchmark is a recognised index of stocks which should not be taken as wholly representative of the Company's investment universe. The Company's investment strategy does not follow or track this index and therefore there may be a degree of divergence between its performance and that of the Company.

CASH - Net current assets including investment in liquidity funds & treasury stocks (if held) and drawn revolving credit facilities (if any) with an original maturity of less than 1 year.

DISCOUNT / PREMIUM - If the share price of an investment company is lower than the net asset value (NAV) per share, the company is said to be trading at a discount. If the share price of an investment company is higher than the net asset value (NAV) per share, the company is said to be trading at a premium. The discount/premium is shown as a percentage of the NAV.

GEARING - Gearing represents the excess amount above shareholders' funds of total assets expressed as a percentage of the shareholders' funds. Total assets include total investments and net current assets/liabilities less cash/cash equivalents and excluding bank loans of less than one year. If the amount calculated is negative this is known as a 'net cash' position.

SECTOR / GEOGRAPHICAL BREAKDOWNS - These are expressed as a percentage of total portfolio and cash. Investments in liquidity funds will be shown as cash.

TOP 10 HOLDINGS - These are expressed as a percentage of total portfolio and cash. Investments in liquidity funds / treasury stocks will not be shown in the top 10 holdings.
