Management Commentary

The Company's share price and net asset value outperformed the benchmark in June. Stock selection in China was positive for performance, notably internet company Alibaba, which we like for the exposure to the broad consumer sector. Elsewhere in Asia, overweight exposure to India, which is the result of bottom-up stock selection, detracted from returns. Tata Consultancy Services was among the weakest-performing positions following a strong May, as the stock was weighed down by concerns over the impact of immigration in the US on its business. Stock selection in India was mitigated by strong performance from Indian mortgage lender HDFC. Financials overall were strong, notably Credicorp, the dominant player in the Peruvian financial sector, which operates in a still under-penetrated consumer banking sector. Portfolio activity was limited in June, in line with our long-term investment focus. We maintain our bias to companies with sustainable competitive advantages, consistent cash flow generation and strong management teams.

SECTOR BREAKDOWN AS AT 31 JULY 2017 ^F

The Trust is an actively managed portfolio, holdings, sector weights, allocations and leverage, as applicable are subject to change at the discretion of the Investment Manager without notice.

RISK INFORMATION

- Exchange rate changes may cause the value of underlying overseas investments to go down as well as up.
- Investments in emerging markets may involve a higher element of risk due to political and economic instability and underdeveloped markets and systems. Shares may also be traded less frequently than those on established markets. This means that there may be difficulty in both buying and selling shares and individual share prices may be subject to short-term price fluctuations.
- This trust may invest in non investment grade bonds which increases the capital risk and have an adverse effect on the performance of funds which invest in them.
- Where permitted, a trust may invest in other investment trusts that utilise gearing (borrowing) which will exaggerate market movements both up and down.
- External factors may cause an entire asset class to decline in value. Prices and values of all shares or all bonds could decline at the same time, or fluctuate in response to the performance of individual companies and general market conditions.
- This trust may utilise gearing (borrowing) which will exaggerate market movements both up and down.
- This trust may also invest in smaller companies which may increase its risk profile.
- The share price may trade at a discount to the Net Asset Value of the company.
- The Trust may invest in China A-Shares through the Shanghai-Hong Kong Stock Connect program which is subject to regulatory change, quota limitations and also operational constraints which may result in increased counterparty risk.

GLOSSARY OF TERMS

BENCHMARK COMPARISON - Comparison of the Company's performance is made with the benchmark. The benchmark is a recognised index of stocks which should not be taken as wholly representative of the Company's investment universe. The Company's investment strategy does not follow or track this index and therefore there may be a degree of divergence between its performance and that of the Company.

CASH - Net current assets including investment in liquidity funds & treasury stocks (if held) and drawn revolving credit facilities (if any) with an original maturity of less than 1 year.

DISCOUNT / PREMIUM - If the share price of an investment company is lower than the net asset value (NAV) per share, the company is said to be trading at a discount. If the share price of an investment company is higher than the net asset value (NAV) per share, the company is said to be trading at a premium. The discount/premium is shown as a percentage of the NAV.

GEARING - Gearing represents the excess amount above shareholders' funds of total assets expressed as a percentage of the shareholders' funds. Total assets include total investments and net current assets/liabilities less cash/cash equivalents and excluding bank loans of less than one year. If the amount calculated is negative this is known as a 'net cash' position.

SECTOR / GEOGRAPHICAL BREAKDOWNS - These are expressed as a percentage of total portfolio and cash. Investments in liquidity funds will be shown as cash.

TOP 10 HOLDINGS - These are expressed as a percentage of total portfolio and cash. Investments in liquidity funds / treasury stocks will not be shown in the top 10 holdings.
