

# JPMorgan Japanese Investment Trust plc

Monthly Update as at 30 June 2018

## Management Commentary

The trust outperformed the benchmark index in May, although Japanese equities declined in local currency terms. Despite strong business results from Japanese companies in the fiscal year 2017, which were released during the month, the index was dragged down from mid-May due to weaker-than-expected January-to-March GDP numbers as well as overseas risk concerns, including US-China trade friction and the political situation around North Korea. The Japanese yen's appreciation against the US dollar also weighed heavily on the market. This was volatile over the month, and stock-specific factors gained the market's focus, creating a positive environment for the trust. Positive contributions came primarily from stock selection. Our high conviction overweight positions in Shiseido (cosmetics) and Recruit (staffing agency) were the largest positive contributors. Our long-standing overweight position in M3 (online medical information services provider) also added value as the share price continued to advance, backed by its strong business momentum. At the sector level, our underweight to the land transportation sector detracted, as defensive stocks were supported over the month and the trust had no exposure within the sector.

# JPMorgan Japanese Investment Trust plc

## SECTOR BREAKDOWN AS AT 30 JUNE 2018 <sup>f</sup>

The Trust is an actively managed portfolio, holdings, sector weights, allocations and leverage, as applicable are subject to change at the discretion of the Investment Manager without notice.

## RISK INFORMATION

- Exchange rate changes may cause the value of underlying overseas investments to go down as well as up.
- External factors may cause an entire asset class to decline in value. Prices and values of all shares or all bonds could decline at the same time, or fluctuate in response to the performance of individual companies and general market conditions.
- This trust may utilise gearing (borrowing) which will exaggerate market movements both up and down.
- This trust may also invest in smaller companies which may increase its risk profile.
- The share price may trade at a discount to the Net Asset Value of the company.
- The single market in which the Trust primarily invests, in this case Japan, may be subject to particular political and economic risks and, as a result, the trust may be more volatile than more broadly diversified trusts.

## EXPLANATORY NOTES

<sup>a</sup>© 2018 Morningstar. All Rights Reserved. The information contained herein: (1) is proprietary to Morningstar; (2) may not be copied or distributed; and (3) is not warranted to be accurate, complete or timely. Neither Morningstar nor its content providers are responsible for any damages or losses arising from any use of this information. Past performance is no guarantee of future results.

<sup>b</sup>NAV is the cum income NAV with debt at fair value, diluted for treasury and/or subscription shares if applicable, with any income reinvested. Share price performance figures are calculated on a mid market basis in GBP with income reinvested on the ex-dividend date. The performance of the company's portfolio, or NAV performance, is not the same as share price performance and shareholders may not realise returns which are the same as NAV performance.

<sup>c</sup>Prospective dividend yield is indicative and based on mid market prices, and include the declared and net prospective dividends for the current financial year.

<sup>d</sup>Gearing represents the excess amount above shareholders' funds of total investments (excluding liquidity fund holdings) expressed as a percentage of the shareholders' funds. If the amount calculated is negative, this is known as a "net cash" position.

<sup>e</sup>Ongoing charges are the management fee and all other operating expenses, excluding interest charges on any borrowing and any performance fee payable expressed as a percentage of the average daily net assets during the year. All figures are for the previous financial year.

<sup>f</sup>Non-Benchmark holdings (where held) are classified in the appropriate sector/region. Cash is net current assets and holdings used as cash substitutes if applicable.

## IMPORTANT INFORMATION

This factsheet is to provide you summary information about the Company and should not be taken as an advice or recommendation to buy or sell its shares. If you are not sure of suitability of our products for your investment needs, please contact a financial adviser. Please ensure reading important product documentation including Key Features and Terms and Conditions, Investor Disclosure Document and Annual Reports and Accounts.

## GLOSSARY OF TERMS

**BENCHMARK COMPARISON** - Comparison of the Company's performance is made with the benchmark. The benchmark is a recognised index of stocks which should not be taken as wholly representative of the Company's investment universe. The Company's investment strategy does not follow or track this index and therefore there may be a degree of divergence between its performance and that of the Company.

**CASH** - Net current assets including investment in liquidity funds & treasury stocks (if held) and drawn revolving credit facilities (if any) with an original maturity of less than 1 year.

**DISCOUNT / PREMIUM** - If the share price of an investment company is lower than the net asset value (NAV) per share, the company is said to be trading at a discount. If the share price of an investment company is higher than the net asset value (NAV) per share, the company is said to be trading at a premium. The discount/premium is shown as a percentage of the NAV.

**GEARING** - Gearing represents the excess amount above shareholders' funds of total assets expressed as a percentage of the shareholders' funds. Total assets include total investments and net current assets/liabilities less cash/cash equivalents and excluding bank loans of less than one year. If the amount calculated is negative this is known as a 'net cash' position.

**SECTOR / GEOGRAPHICAL BREAKDOWNS** - These are expressed as a percentage of total portfolio and cash. Investments in liquidity funds will be shown as cash.

**TOP 10 HOLDINGS** - These are expressed as a percentage of total portfolio and cash. Investments in liquidity funds / treasury stocks will not be shown in the top 10 holdings.
