

The Mercantile Investment Trust plc

Monthly Update as at 31 May 2018

Overall Morningstar Rating™ (as at 31/05/18) ^A ★ ★ ★ ★ ★
Morningstar Category™ UK Mid-Cap Equity

Management Commentary

The Mercantile Investment Trust outperformed its benchmark in February. Positive contributors to relative returns included stock selection across a range of sectors and an underweight position in support services. Detractors included stock selection in financial services and stock selection and an underweight position in industrial transportation. An overweight position in the integrated mining and steel company EVRAZ was positive for relative returns, as the shares outperformed in anticipation of a substantial uplift in earnings and cash flow given the positive outlook for end markets. Our overweight position in Fidessa Group was also positive for returns as the trading and investment management software provider received a takeover bid from Temenos. Despite announcing a significant growth in assets in 2017, the alternative asset manager Man Group's shares struggled on the back of commentary suggesting that recent market volatility had negatively impacted performance for some of its key strategies. An overweight position in Sophos also detracted in February. After a period of exceptional share price performance through 2017, the share price fell when the company gave its third-quarter trading update, which included lower-than-expected guidance for the fourth quarter.

CUMULATIVE PERFORMANCE ENDING MAY 2018

% based to 100

CUMULATIVE PERFORMANCE AS AT 31 MAY 2018

%	1 Y	3 Y	5 Y
Share price	15.2	39.9	95.0

Any forecasts, figures, opinions, statements of financial market trends or investment techniques and strategies expressed are unless otherwise stated, J.P. Morgan Asset Management's own at the date of this document.

The Mercantile Investment Trust plc

SECTOR BREAKDOWN AS AT 31 MAY 2018 ^F

The Trust is an actively managed portfolio, holdings, sector weights, allocations and leverage, as applicable are subject to change at the discretion of the Investment Manager without notice.

RISK INFORMATION

- External factors may cause an entire asset class to decline in value. Prices and values of all shares or all bonds could decline at the same time, or fluctuate in response to the performance of individual companies and general market conditions.
- This trust may utilise gearing (borrowing) which will exaggerate market movements both up and down.
- This trust may also invest in smaller companies which may increase its risk profile.
- The share price may trade at a discount to the Net Asset Value of the company.
- The single market in which the Trust primarily invests, in this case the UK, may be subject to particular political and economic risks and, as a result, the trust may be more volatile than more broadly diversified trusts.
- Companies listed on AIM tend to be smaller and early stage companies and may carry greater risks than an investment in a company with a full listing on the London Stock Exchange.

EXPLANATORY NOTES

^A© 2018 Morningstar. All Rights Reserved. The information contained herein: (1) is proprietary to Morningstar; (2) may not be copied or distributed; and (3) is not warranted to be accurate, complete or timely. Neither Morningstar nor its content providers are responsible for any damages or losses arising from any use of this information. Past performance is no guarantee of future results.

^BNAV is the cum income NAV with debt at fair value, diluted for treasury and/or subscription shares if applicable, with any income reinvested. Share price performance figures are calculated on a mid market basis in GBP with income reinvested on the ex-dividend date. The performance of the company's portfolio, or NAV performance, is not the same as share price performance and shareholders may not realise returns which are the same as NAV performance.

^CProspective dividend yield is indicative and based on mid market prices, and include the declared and net prospective dividends for the current financial year.

^DGearing represents the excess amount above shareholders' funds of total investments (excluding liquidity fund holdings) expressed as a percentage of the shareholders' funds. If the amount calculated is negative, this is known as a "net cash" position.

^EOngoing charges are the management fee and all other operating expenses, excluding interest charges on any borrowing and any performance fee payable expressed as a percentage of the average daily net assets during the year.

^FNon-Benchmark holdings (where held) are classified in the appropriate sector/region. Cash is net current assets and holdings used as cash substitutes if applicable.

IMPORTANT INFORMATION

This factsheet is to provide you summary information about the Company and should not be taken as an advice or recommendation to buy or sell its shares. If you are not sure of suitability of our products for your investment needs, please contact a financial adviser. Please ensure reading important product documentation including Key Features and Terms and Conditions, Investor Disclosure Document and Annual Reports and Accounts.

GLOSSARY OF TERMS

BENCHMARK COMPARISON - Comparison of the Company's performance is made with the benchmark. The benchmark is a recognised index of stocks which should not be taken as wholly representative of the Company's investment universe. The Company's investment strategy does not follow or track this index and therefore there may be a degree of divergence between its performance and that of the Company.

CASH - Net current assets including investment in liquidity funds & treasury stocks (if held) and drawn revolving credit facilities (if any) with an original maturity of less than 1 year.

DISCOUNT / PREMIUM - If the share price of an investment company is lower than the net asset value (NAV) per share, the company is said to be trading at a discount. If the share price of an investment company is higher than the net asset value (NAV) per share, the company is said to be trading at a premium. The discount/premium is shown as a percentage of the NAV.

GEARING - Gearing represents the excess amount above shareholders' funds of total assets expressed as a percentage of the shareholders' funds. Total assets include total investments and net current assets/liabilities less cash/cash equivalents and excluding bank loans of less than one year. If the amount calculated is negative this is known as a 'net cash' position.

SECTOR / GEOGRAPHICAL BREAKDOWNS - These are expressed as a percentage of total portfolio and cash. Investments in liquidity funds will be shown as cash.

TOP 10 HOLDINGS - These are expressed as a percentage of total portfolio and cash. Investments in liquidity funds / treasury stocks will not be shown in the top 10 holdings.
