

JPMorgan Mid Cap Investment Trust plc

Risk indicator Based on the Company volatility for the past 5 years. See the Key Information Document (KID) for details.

Company overview

ISIN GB0002357613 Sedol 0235761 Bloomberg JMF LN Reuters JMF.L

Objective: Aims to achieve capital growth from investing in medium sized UK listed companies, by outperformance of the FTSE Mid 250 Index. The Company will predominantly invest in quoted companies from the FTSE Mid 250 Index, although, where appropriate, it may invest in quoted UK companies outside of this index as well as companies quoted on the Alternative Investment Market. The Company has the ability to use borrowing to gear the portfolio within the range of 5% net cash to 25% geared in normal market conditions.

PERFORMANCE DISCLOSURES

Past performance is not a guide to current and future performance. The value of your investments and any income from them may fall as well as rise and you may not get back the full amount you invested.

Source: J.P. Morgan Asset Management/Morningstar. Net asset value performance data has been calculated on a NAV to NAV basis, including ongoing charges and any applicable fees, with any income reinvested, in GBP. NAV is the cum income NAV with debt at fair value, diluted for treasury and/or subscription shares if applicable, with any income reinvested. Share price performance figures are calculated on a mid market basis in GBP with income reinvested on the ex-dividend date. The performance of the company's portfolio, or NAV performance, is not the same as share price performance and shareholders may not realise returns which are the same as NAV performance. Indices do not include fees or operating expenses and you cannot invest in them.

Prospective dividend yield is for the investment trust's current financial year. It is indicative only and based on the latest month end mid-market price and the declared and net prospective dividends for the current financial year.

See the material risks, general disclosures and definitions on page 2.

Key risks

External factors may cause an entire asset class to decline in value. Prices and values of all shares or all bonds could decline at the same time, or fluctuate in response to the performance of individual companies and general market conditions.

This Company may utilise gearing (borrowing) which will exaggerate market movements both up and down.

This Company may also invest in smaller companies which may increase its risk profile. The share price may trade at a discount to the Net Asset Value of the Company. The single market in which the Company primarily

invests, in this case the UK, may be subject to particular political and economic risks and, as a result, the Company may be more volatile than more broadly diversified Companies.

Companies listed on AIM tend to be smaller and early stage companies and may carry greater risks than an investment in a company with a full listing on the London Stock Exchange.

GENERAL DISCLOSURES

Before investing, obtain and review the current Key Information Document (KID) and the Investor Disclosure Document for this Company. The Investor Disclosure Document, and Key Features / Terms & Conditions can be obtained free of charge from JPMorgan Asset Management (UK) Limited, and the Key Information Document can be obtained from JPMorgan Funds Limited or www.jpmmidcap.co.uk/investmenttrust.

This material should not be considered as advice or an investment recommendation. Company holdings and performance are likely to have changed since the report date. No provider of information presented here, including index and ratings information, is liable for damages or losses of any type arising from use of their information. No warranty of accuracy is given and no liability in respect of any error or omission is accepted. To the extent permitted by applicable law, we may record telephone calls and monitor electronic communications to comply with our legal and regulatory obligations and internal policies. Personal data will be collected, stored and processed by J.P. Morgan Asset Management in accordance with our EMEA Privacy Policy www.jpmmidcap.co.uk/emea-privacy-policy

Ongoing charges are the management fee and all other operating expenses, excluding interest charges on any borrowing and any performance fee payable expressed as a percentage of the

average daily net assets during the year. All the figures are for the previous financial year. For information on ongoing charges please refer to the Company's Annual Report and Accounts. www.jpmmidcap.co.uk

DEFINITIONS

Overall Morningstar Rating™ assessment of a fund's past performance, based on both return and

risk and shows how similar investments compare with their competitors. Investment decisions should not be based on a high rating alone.

Benchmark comparison Comparison of the Company's performance is made with the benchmark. The benchmark is a recognised index of stocks which should not be taken as wholly representative of the Company's investment universe. The Company's investment strategy does not follow or track this index and therefore there may be a degree of divergence between its performance and that of the Company.

Gearing Gearing represents the excess amount above shareholders' funds of total investments (excluding liquidity fund holdings) expressed as a percentage of the shareholders' funds. If the amount calculated is negative, this is known as a "net cash" position.

Discount/Premium If the share price of an investment company is lower than the net asset value (NAV) per share, the company is said to be trading at a discount. If the share price of an investment company is higher than the net asset value (NAV) per share, the company is said to be trading at a premium. The discount/premium is shown as a percentage of the NAV.

NAV The value of investment and cash, including current year revenue, less liabilities (prior charges such as loans, debenture stock and preference shares at fair value).

Cash A company's net exposure to cash / cash equivalents [includes investment in liquidity funds and treasury stocks if held] expressed as a percentage of shareholders funds after any offset against its gearing.
