PERFORMANCE DISCLOSURES

Past performance is not a guide to current and future performance. The value of your investments and any income from them may fall as well as rise and you may not get back the full amount you invested.

Source: J.P.Morgan Asset Management. Share class performance shown is based on the quoted price of the share class, assumes any net income was reinvested, and includes ongoing charges but not any entry or exit fees. Indices do not include fees or operating expenses and you cannot invest in them.

The benchmark is for comparative purposes only unless specifically referenced in the Funds' Investment Objective and Policy.

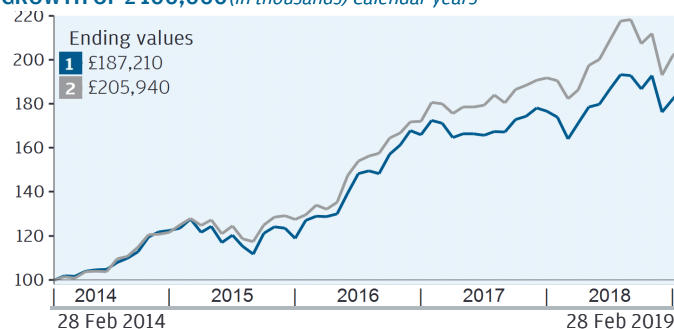

The Yield reflects net distributions declared over the past 12 months as a percentage of the quoted price at the date shown. It does not include the Entry charge and investors may be subject to tax on their distributions. Where a portion of the fund's expenses are charged to capital this has the effect of increasing the distribution for the year and constraining the fund's capital performance to an equivalent extent.

See the material risks, general disclosures and definitions on pages 2 & 3.

Key risks

The value of equity and equity-linked securities may fluctuate in response to the performance of individual companies and general market conditions.

As the portfolio of the Fund is primarily focused on generating income, it may bear little resemblance

to the composition of its benchmark. The single market in which the Fund primarily invests, in this case the US, may be subject to particular political and economic risks and, as a result, the Fund may be more volatile than more broadly diversified funds. For investors in Share Classes which are not hedged to Sterling, movements in currency exchange rates can adversely affect the return of

your investment. This Fund charges the annual fee of the Authorised Corporate Director (ACD) against capital, which will increase the amount of income available for distribution to Shareholders, but may constrain capital growth. It may also have tax implications for certain investors.

GENERAL DISCLOSURES

Before investing, obtain and review the current Prospectus, Key Investor Information Document (KIID) and the Key Features Document/Terms & Conditions for this fund which are available from JPMorgan Asset Management (UK) Limited.

DEFINITIONS

NAV Net Asset Value of a fund's assets less its liabilities per Share.

Quoted Price The single price at which all client orders are executed.

Morningstar Analyst Rating™ Morningstar's forward looking fund rating.

Overall Morningstar Rating™ assessment of a fund's past performance, based on both return and risk and shows how similar investments compare with their competitors. Investment decisions should not be based on a high rating alone.

FE Crown rating are quantitative ratings ranging from one to five designed to help investors identify funds which have displayed superior performance in terms of stockpicking, consistency and risk control.

FE Crown Fund Ratings are however purely quantitative and backward looking, and, as such, cannot offer any certainty about the future.

FE Trustnet crown rating as at 28 February 2019.
Rayner Spencer Mills rated fund rating as at 28 February 2019.

Uses both a qualitative and quantitative assessment of the funds. The fund is simply rated or not.

Square Mile Research rating as at 28 February 2019.

A Square Mile Fund Rating denotes a fund that is truly "best in class". Put simply, a Square Mile Fund Rating is only given to a fund that we are prepared to recommend to our clients. Fund managers do not pay for our ratings; they cannot be purchased and are only achieved by the "best-in-class" funds.

The funds we recommend are each assigned a rating - A, AA, AAA or R - reflecting Square Mile's conviction in each fund's ability to deliver on expectations. These simple ratings are the result of exhaustive and detailed qualitative research, backed up by quantitative analysis. "AAA" represents the very highest level of conviction in a fund and its manager, and is a practical demonstration of our belief in the long-term consistent delivery of the fund's objectives.

Our team of investment research analysts also works to identify newer or untested funds or managers that have real potential to deliver their stated objectives. In these circumstances, we are not in a position to award a full fund rating, and therefore these funds are assigned a "Positive Prospects" rating. Over time, if these managers deliver to our expectations and achieve their expected outcome, we would expect them to progress to A, AA, AAA or R ratings. Not widely used.

The Adviser Centre, as at 28 February 2019. They have three key ratings: Established; Positive Watch; Recommended.

Correlation measures the relationship between the movement of the fund and its benchmark. A correlation of 1.00 indicates that the fund perfectly matched its benchmark.

Alpha (%) a measure of excess return generated by a manager compared to the benchmark. An

alpha of 1.00 indicates that a fund has outperformed its benchmark by 1%.

Beta a measure of a fund's sensitivity to market movements (as represented by the fund's benchmark). A beta of 1.10 suggests the fund could perform 10% better than the benchmark in up markets and 10% worse in down markets,

assuming all other factors remain constant.

Annualised volatility (%) an absolute measure of volatility and measures the extent to which returns vary up and down over a given period. High volatility means that the returns have been more variable over time. The measure is expressed as an annualised value.

Sharpe ratio measures the performance of an investment adjusting for the amount of risk taken (compared a risk-free investment). The higher the Sharpe ratio the better the returns compared to the risk taken.
